

In the table below, you'll find examples of other chemicals found in secondhand smoke and their common use.

Example	Common use
Acetone	Nail polish remover
Acetic Acid	Vinegar
Aluminum	Metal
Ammonia	Floor and toilet cleaner
Arsenic	Rat poison
Benzene	Industrial solvent
Benzo(a)pyrene	Diesel exhaust fume
Butane	Cigarette lighter fluid
Cadmium	Rechargeable batteries
Copper	Electric wiring
Carbon Monoxide	Car exhaust fume
DDT	Insecticide
Dieldrin	Insecticide
Formaldehyde	Preservative for dead bodies, wood, and fabrics
Hexamine	Barbecue lighter
Hydrogen Cyanide	Gas chamber poison
Lead	Fishing sinkers
Magnesium	Flares
Methane	Swamp gas
Methanol	Rocket and car fuel
Naphthalene	Moth balls
Nicotine	Insecticide and addictive drug in tobacco
Nitrobenzene	Petrol additive
Nitrous Oxide Phenols	Disinfectant
Polonium 210	Radioactive compound
Silicon	Computer chips
Silver	Jewellery
Stearic Acid	Candle wax
Titanium	Aeroplanes and missiles
Toluene	Industrial solvent
Vinyl Chloride	Raw material to make plastic
Zinc	Metal, in coins
